## Download Open Wpl Files

Method 1: I suggest that you disable the Antivirus software and the Firewalls temporarily and check if you have are able to stream the video.. wpl is a metafile that is used to stream the playlists from the online content I suggest that you try the below methods to fix this issue.. Hello ron62b, 1 Do you get this error when trying to play a particular file or all the files? Where exactly are you trying to play the file from? What website are you trying to stream the video from?.. How to Open and Play WPL File with WPL File Player Since WPL is exclusive to Windows Media Player, you can take it to play WPL files easily.. Note: Please make sure that you enable to firewalls once you finish doing the test.. Click the 'Tools' menu and select 'Options' Click the 'Network' tab.. But today, there are various media players like VLC, Winamp and more can also serve as great WPL files players.. Browse through your computer's files and select the WPL file you want to play Click 'Open..' ' The WPL file will appear under the 'Playlists' list on the left of Windows Media Player.. Method 2: Try to change the proxy settings Open Windows Media Player, Press the 'Alt' key to bring up the file menu.
